CAREER OBJECTIVE

Efficient Computer Engineering major currently attending Instituto Federal de Educação Ciência e Tecnologia, with Android and Web work experience. Aiming to leverage a proven knowledge of programming, application and web development skills to successfully fill the Developer role at your company. Frequently praised as quality-oriented by my peers, and can be relied upon to help your company achieve its goals.

LATEST PROJECT

Present
Ago 2022

Terrus Café - Bayer; Embrapii; Cooxupé and Quanticum
Mobile Project using Flutter

- Flutter and Dart;
- Flutter Map;
- Clean Dart with BLoC;
- REST Api;
- Offline map and data caching.

EXPERIENCE

Present
Aug 2022

Terrus Café - Bayer; Embrapii; Cooxupé and Quanticum
Mobile Developer

- Develop and maintain mobile application with Flutter;
- Consume from REST API;
- Integration with Mapbox provider.

Aug 2022
Oct 2021

Aldeia Consultoria Jr, Poços de Caldas, MG
Chief Technology Officer

- Plan and coordinate project activity.
- Consult with users, management, vendors, and technicians to assess computing needs and system requirements.
- Stay abreast of advances in technology.
- Create pipelines for CI/CD with github actions and fastlane
- Recruit, hire and train new staff.
- Assign and review the work of the team.

Sep 2021
Jul 2021

Full Stack Web Developer

- Design, build and maintain web applications using ReactJS framework.
- Create, manage and connect databases with MySQL.

Present
Jan 2020

Freelancer
Android Developer

- Create mobile applications using Flutter and/or Kotlin with Firebase.
- Consult consumer requirements to determine project scope and technologies necessities.

OTHER RECENT PROJECTS

Freelance

Flutter App - Wedding Gifts

- Flutter and Dart;
- Clean Dart with Bloc;
- Firebase.

I was responsible for developing login and data storage/update features. Integration with Firebase Firestore and Authentication services was a must. The stakeholders were satisfied with the end product.

Freelance

Android App - Beer Brewing Mashing Control.

- Native Android;
- Kotlin/Java;
- Bluetooth Data Transfer;
- Arduino;
- Local data caching.

The app controls the step mash temperature and duration of the beer recipe. Use Arduino and Bluetooth connection to transfer data and determine if the heat source should be operational.
